SOCIETY FOR HEALTH SYSTEMS

LEADING HEALTHCARE IMPROVEMENT

Recipes for Success (Ways to Get the Work Done)

Avi Fishman, MBA, SSBB, LMBB

Presenters & Disclosures

Avi Fishman

MBA, SSBB, LMBB

I have nothing to disclose

Key Learning Objectives

You will learn about my philosophy towards people and problems.

Will go over the various ways the Process Improvers can identify waste and bring about meaningful and sustainable improvements within an organization; which are:

- Mapping
- Internal Consulting
- 5S
- Kaizen Events
- Traditional Projects
- Mentor/Train
- Embedded Approach

My Philosophy towards People and Projects

Everything I do - is done with respect
I don't tell people what to do or where to go

If you already know your solution - don't call me
If you are looking to add FTE's - don't call me

Project Work – The Bottom Line

Everything you do – must result in or lead to

- identifying waste
- bring about measurable improvement
- meet the needs of the customer

Let's Get Started

Everything starts with a Charter

Date		Version #		Draft <input checked="" type="checkbox"/>	
Date version created				Final <input type="checkbox"/>	
<h2>PROJECT CHARTER</h2>					
WHAT	Project Name Short description of project				
	Project Description -Project type (Lean, 5S, Kaizen) -Project Structure (DMAIC, tool application, statistical analysis) -Tool(s) application (5S, Process Mapping, Statistics)		IN Scope Description of the improvement project inner boundaries to be addressed		OUT of Scope Description of the improvement project outer boundaries not to be addressed
WHERE	Project Location Name of facility and department where improvement implementation will take place				
WHY	Background -What triggered the project start? (i.g. data trend reported, PI observations, Gemba walk, leadership recommendation, management/front line initiative) -Problem statement -Operational definitions		Project Purpose & Objectives -SMART goals (Specific, Measurable, Achievable, Realistic, Time-bound) -Expected business impact & benefit(s)		Key Performance Indicators Identify the metrics to track and their initial status (data baseline)
	Strategic Objectives <input type="checkbox"/> Value-Based Care <input type="checkbox"/> Consumer Focus <input type="checkbox"/> Primary Care Alignment <input type="checkbox"/> Quality Improvement <input type="checkbox"/> Cost Reduction <input type="checkbox"/> New Market & Ambulatory Growth				
HOW	Project Duration & Timeline -Estimation of overall project duration (# of weeks, months) -Estimated timeframe for each improvement project deliverable/phase		Communication Strategy Details of communication plan: who (recipients), when (tollgates, milestone), frequency (biweekly, monthly), medium (email, meeting)		Assumptions List of internal & external factors, and dependencies that impact the execution and success of the project (e.g. executive leadership support, ownership & accountability for implementation, ownership upon handoff)
WHO	Project Team -List of project team participants who will complete the work, and local leader(s) who will assist with decision making, issue resolution, and strategic direction/guidance -Identify department & role for each member				Impacted Stakeholders List of individuals and/or departments who will be impacted by, have interest in, and must be kept informed of the improvement project
	Team Lead / PI Resource PI resource / project facilitator

Ways to Get the Work Done

M

PROCESS MAPPING

Small (Limited
Engagement)

1 to 2 Months

To identify
"current state"
process steps
and where there
may be some
inefficiencies

1 Lead
(possibly + 1 Assist)

IC

INTERNAL CONSULTING

Small (Limited
Engagement)

1 to 3 Months

To investigate,
summarize
findings in order
to recommend
quick fixes

1 Lead
(possibly + 1 Assist)

5S

5S PROJECT

Large (Complex)

3 to 6 Months

To bring about
improved space
organization / use
for efficiency,
effectiveness &
safety

1 Lead + 1 Assist

KE

KAIZEN EVENT

Large (Complex)

2 Weeks + 4 Days
+ 2 Months

To bring about
incremental and
sustainable
improvements in
less time than a
Traditional Project

Entire Team

TP

TRADITIONAL PROJECT

Large (Complex)

6+ Months

To bring about
incremental and
sustainable
improvements in a
methodical,
comprehensive
manner

1 Lead + 1-2 Assist

MT

MENTOR/ TRAIN

Large (Limited
Engagement)

6 to 9 Months

To mentor / train
Green Belts and
future leaders to
engage in
meaningful
DMAIC and 5S
projects

1 Lead

EA

EMBEDDED APPROACH

Large (Complex)

6 to 9 Months

To bring about
incremental and
sustainable
Improvements
within a
department

1 Lead
(possibly + 1 Assist)

Everything you do requires ongoing leadership support and commitment from front-line management and those that do the work

- can include SIPOC, swim lane, cross functional or spaghetti mapping

- utilizes Lean concepts

- 5S stands for sort, set in order, shine standardize and sustain

- follows the DMAIC framework of: Define, Measure, Analyze, Improve & Control

- follows the DMAIC framework of: Define, Measure, Analyze, Improve & Control

- follows the DMAIC framework or 5S. Impactful means to train future "Lean Doers" within MHS

- follows the DMAIC framework or 5S. Impactful means to train future "Lean Doers" within MHS

M

Process Mapping

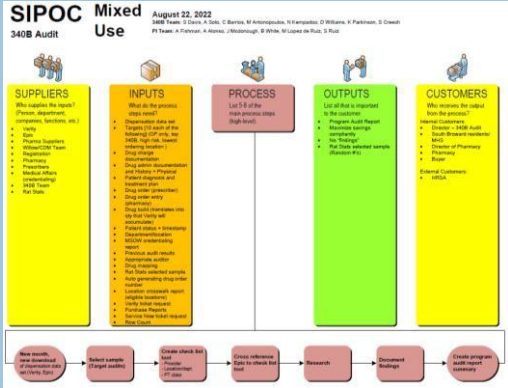

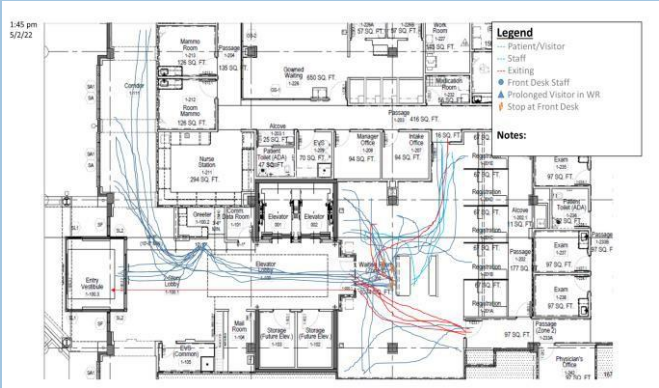

Mapping ≠ a project

Can take 1 to 2 months

Can be done by 1 or 2 Team Members

Helps layout current state process as well as identify process inefficiencies (NVA)

Can include SIPOC, swim lane, cross functional or spaghetti mapping

Everything you do requires ongoing leadership support and commitment from front-line management and those that do the work

IC

Internal Consulting

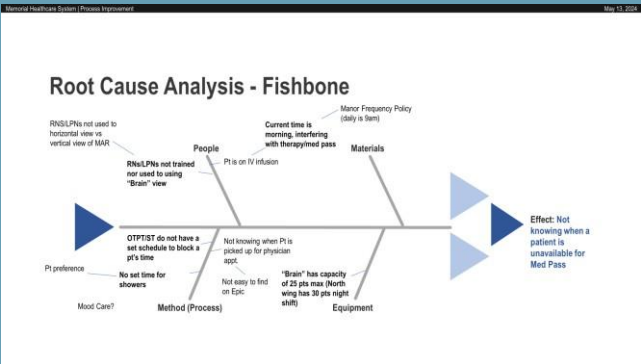

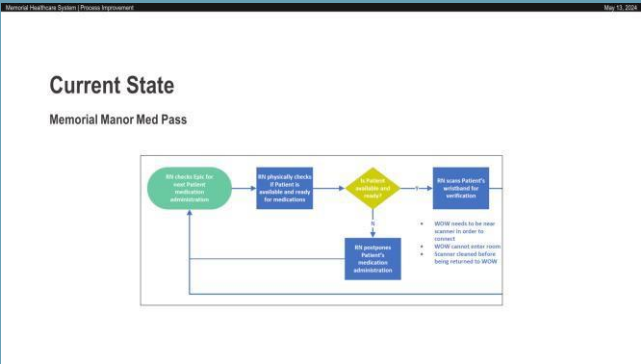

IC ≠ project; but can lead to one

Can take 1 to 3 months

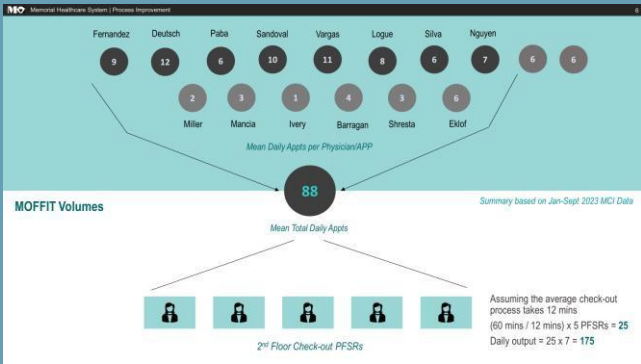

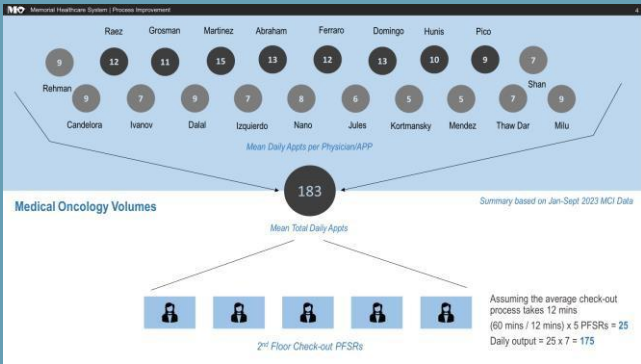

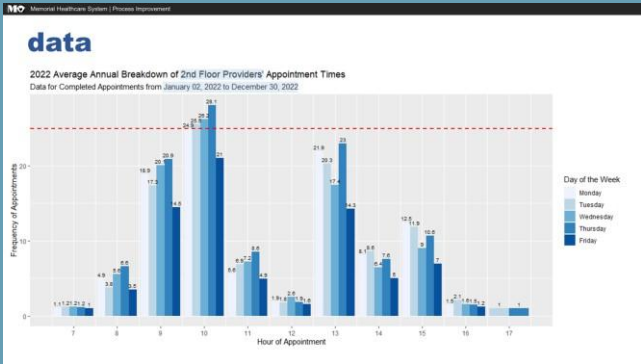

Can be done by 1 or 2 Team Members

To investigate, summarize findings in order to recommend some quick fixes

Can result in a request for a project

NVA #	Non-Value-Added Activities	Explorable?
1	RN unable to see if patient is busy within system (MRHS uses the "Brain" to see meds, admin times, and appts for all patients.	Possibly
2	Must scan to access patient's MAR—begin medication scanning.	No
3	WOW not allowed in room.	RNVA
4	Scanner cleaned after use.	RNVA
5	Hand-stop/warning: Implement earlier process constraints for unsafe med administrations.	Possibly
6	Moving WOW constantly.	Possibly
7	Only two patient meds at a time.	Yes
8	Patient list manually created. Patient list updated with zone updates.	No
9	Manually labeling each med bag (MRHS uses patient's admission sticker)	Possibly
10	Must narcotics have 30 min admin window?	Yes
11	Grabbing narcotics interrupt flow.	Yes
12	Do medications need to be documented as taken? Why not only non-administered meds?	No

Everything you do requires ongoing leadership support and commitment from front-line management and those that do the work

5S

5S Project

Can be large and complex

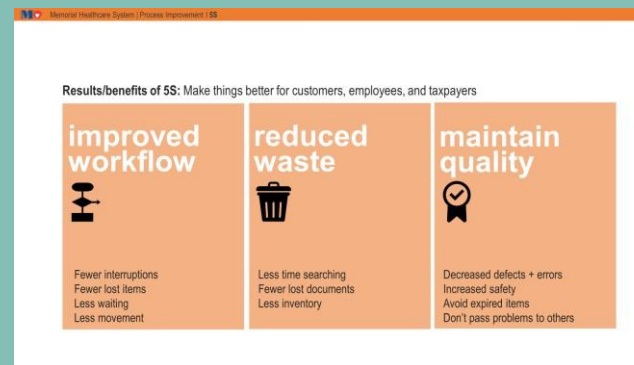

Can take 3 to 6 months

Can be done by 1 or 2 Team Members

To bring about improved space organization / use for efficiency, effectiveness & safety

5S stands for sort, set in order, shine standardize and sustain

Everything you do requires ongoing leadership support and commitment from front-line management and those that do the work

AUDITOR(S)		DATE	
		RATING SCORE	
S1 SORT (Remove unneeded or unnecessary items from the work area)		NO - 0	YES - 1
1	Have all excess and outdated supplies been cleared from the area?		
2	Have all non-essential supplies, including those outside the workplace, been removed?		
3	Have all extra and/or outdated equipment been cleared from the work area?		
4	Is discharge and documentation, as needed, done and clearly displayed?		
NEW TOTAL RESULT IN THIS SECTION		0	
		RATING SCORE	
S2 SET IN ORDER (A place for everything and everything in its place)		NO - 0	YES - 1
1	Are all chairs, drawers, and equipment on the cart clearly marked with labels?		
2	Are items placed with labels in their proper location in the cart?		
3	Is equipment using appropriate measures for safe storage?		
NEW TOTAL RESULT IN THIS SECTION		0	
		RATING SCORE	
S3 SHINE (Return work area to like new conditions)		NO - 0	YES - 1
1	Are all floors completely clean, including under and around carts?		
2	Are all chairs, storage areas, drawers, and equipment clean?		
3	Are machines and equipment fully cleaned and ready for use?		
4	Is each staff responsible for the cleanliness of their area?		
NEW TOTAL RESULT IN THIS SECTION		0	
		RATING SCORE	
S4 STANDARDIZE (Methods exist to maintain the first 3 S's)		NO - 0	YES - 1
1	Are all employees trained in 5S methodology?		
2	Are 5S responsibilities assigned, posted, and up-to-date?		
3	Has new material, equipment, etc. brought into the workplace been assigned a location?		
4	Are the 5S Standard Operating Procedures (SOP) up to date and easily accessible? Has an effective audit system?		
NEW TOTAL RESULT IN THIS SECTION		0	
		RATING SCORE	
S5 SUSTAIN (Self Discipline and Will to demonstrated in maintaining and improving the 5S system)		NO - 0	YES - 1
1	Are 5S standards and responsibilities clearly understood by all staff?		
2	Are 5S responsibilities assigned and up-to-date?		
3	Are standards clearly displayed in the work area?		
4	Does the team hold each other accountable for maintaining a clean workplace?		
NEW TOTAL RESULT IN THIS SECTION		0	
TOTAL ACCUMULATED SCORE (Yes/No/Not Done/Not Done/Not Done)		0	
AUDITOR(S) COMMENTS AND/OR SUGGESTIONS (Comments are required for all items with a response of NO)			
S1:			
S2:			
S3:			
S4:			
S5:			

Keeping the workspace uncluttered and organized

Keeping it "easy" to find those Discharges

Equipment and Supplies - Everything in its place

Garbage does not need to be unsightly

KE

Kaizen
Event

Most definitely large and complex

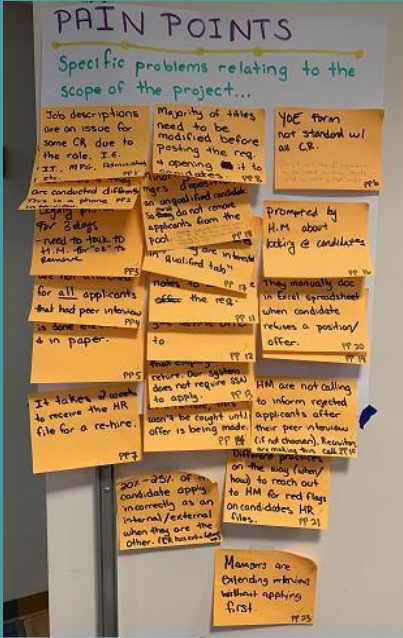

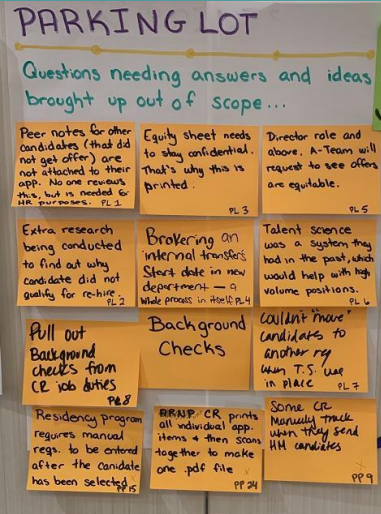

Can take 2 Weeks (pre work) + 4 Days (KE) +
2 months (post work and related rollouts)

Requires involvement of the entire PI team

To bring about incremental and sustainable
improvements in less time than a Traditional
Project

Follows the DMIAC framework of:
Define, Measure, Analyze, Improve & Control

Everything you do requires ongoing leadership support and commitment from front-line management and those that do the work

Traditional Project

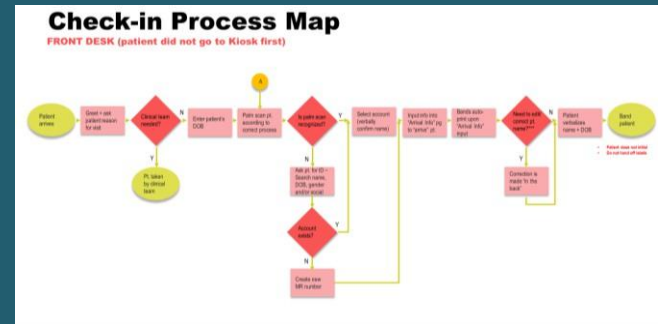

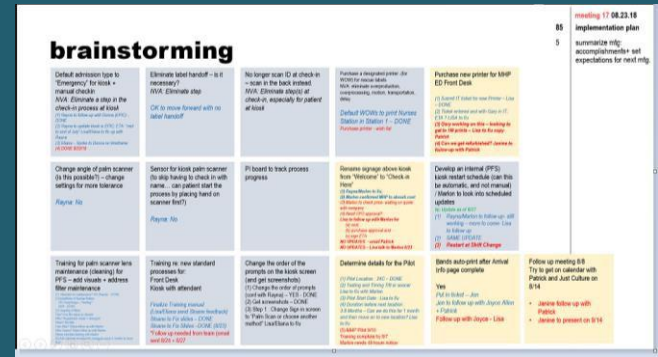

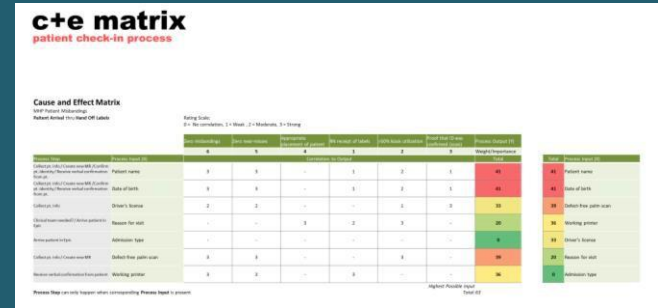

Can take 6 to 9 months (or more)

Can be done by 1 to 3 Team Members

To bring about incremental and sustainable improvements

Follows the DMAIC framework of:
Define, Measure, Analyze, Improve & Control

Everything you do requires ongoing leadership support and commitment from front-line management and those that do the work

MT

Mentor/
Train

To help others lead a project

Limited engagement that can several months

Can be done by 1 Team Member

To mentor / train Green Belts and future leaders to engage in meaningful DMAIC and 5S projects

Follows the DMAIC framework of:
Define, Measure, Analyze, Improve & Control

Everything you do requires ongoing leadership support and commitment from front-line management and those that do the work

EA

Embedded
Approach

large and complex

Can take 6 to 9 months (or more)

Can be done by 1 to 2 Team Members

Opportunity to train department members

Lean Principles and how to engage in meaningful
Improvement work

To bring about incremental and sustainable
Improvements within a department

Follows the DMIAC framework

Everything you do requires ongoing leadership support and commitment from front-line management and those that do the work

Remember

Everything you do requires ongoing leadership support and commitment from front-line management and those that do the work

Otherwise... failure may be imminent

In Conclusion

There are many ways to do improvement work.

It is important to know your customer; what they want and more importantly what they need. While they may understand their business; they may not yet understand their problem.

You need to determine the best approach to take to help your customer in order help them move forward.

Everyone may want a Kaizen Event; but sometimes they will benefit with starting off with Mapping and then you can take it from there.
